The Self-Perfected

Memorandum - Elective surgery

- Upcoming products from partners, official announcements in two weeks.
- Read operating instructions. Will be expected to deliver installations from street date.

Alacritous Rebuild: Internal Body Cyberware, 5000eb, 8d6 Humanity Loss, Hospital Installation.

Adjustments made to CNS. Inserts conductive pathways to improve response times. Procedure will require access to the full spine. Side effect of unintentional motion arising from thought. Patient may require physiotherapy. Recommend adapting Kerenzikov adjustment program.

Requires three option slots. Only one Internal Body Rebuild may be installed into a character. Reduces Dexterity by one. Increases Reflexes by two.

Lissom Rebuild: Internal Body Cyberware, 5000eb, 8d6 Humanity Loss, Hospital Installation.

Slow response tissue inserted. Management is achieved by subdermal biochips requiring yes/confirm instructions from PNS. Patient should be advised that procedure is invasive, and dermis layer may need to be entirely replaced.

Requires three option slots. Only one Internal Body Rebuild may be installed into a character. Reduces Reflexes by one. Increases Dexterity by two.

MacroCyberweapon Rebuild: Internal Body Cyberware, 5000eb, 4d6 Humanity Loss, Hospital Installation.

Insertion of deployable unit will require making space within the diaphragm. Ideal installation location is adjacent to the spine. Awaiting recommendations from designer on sheathing local organs to avoid possibility of trauma. Do not supply power before patient is in conscious control. Autodefence measures will be live.

Requires four option slots. Only one Internal Body Rebuild may be installed into a character. Installs an Exotic Rof 2 Very Heavy Melee Weapon that can be concealed without a check and has a range of 4m into the user. If the user does not attack with this weapon in a turn, it may be used to make a Rof 1 attack at the closest enemy target, using a Combat Number of 10.

Modular Rebuild: Internal Body Cyberware, 1000eb, 4d6 Humanity Loss, Hospital Installation.

Variable mountings at shoulders and hips require proprietary tooling to install. Be advised lead time on replacements is currently eight months, and allocated supply for this facility is four units only. Breakages will be deducted from pay.

Requires three option slots. Only one Internal Body Rebuild may be installed into a character. The user treats all cyberlimbs as if they had Quick Change Mounts installed.
